

## Handy is a bit of an understatement really.

At times, just having a clean property doesn't quite cut it. The overall look and presentation depends also on how the property is maintained and serviced. SKG provide services of both the handyman kind and larger building projects. With specialist services such as plumbing, painting, electrical, general repairs, tiling, plastering, locks and many more, SKG continually enhance the look of buildings, properties and specialist areas across NSW and the ACT region.

SKG offer fast and reliable services that are complete with professionalism, efficiency and attention to detail. SKG's robust service-oriented approach to all handyman and building maintenance projects has seen SKG become the industry's leading integrated property services provider.

In addition, SKG also supply services of a larger nature including civil engineering and building framework services such as shop fit-outs and new installation services. The ability to offer such a variety of choice at very reasonable prices have attracted many small to large organisations to switch to SKG.
