

# Innovative. Practical. Powerful. — Praxeo works.

Praxeo is a dynamic touch-screen software tool that manages and monitors staff. Being a secure web-based program, Praxeo allows SKG to manage sites remotely, laying down consistent repeated processes each and every time an SKG employee, contractor or visitor accesses a site.

The benefits of Praxeo are plentiful. The system provides SKG the following:

- Assessment of contractor activity with recordings of attendance and time
- Communication between staff with uniform and custom messages for all sites or site specific rules
- Capacity to remotely manage sites
- Ongoing OH&S training of site personnel
- Reduction in liability insurance premiums through better risk management and OHS compliance
- Meeting of SKG's duty of care obligations, on all sites consistently, with verifiable proof 24/7
- Delivery of real time accurate reports.

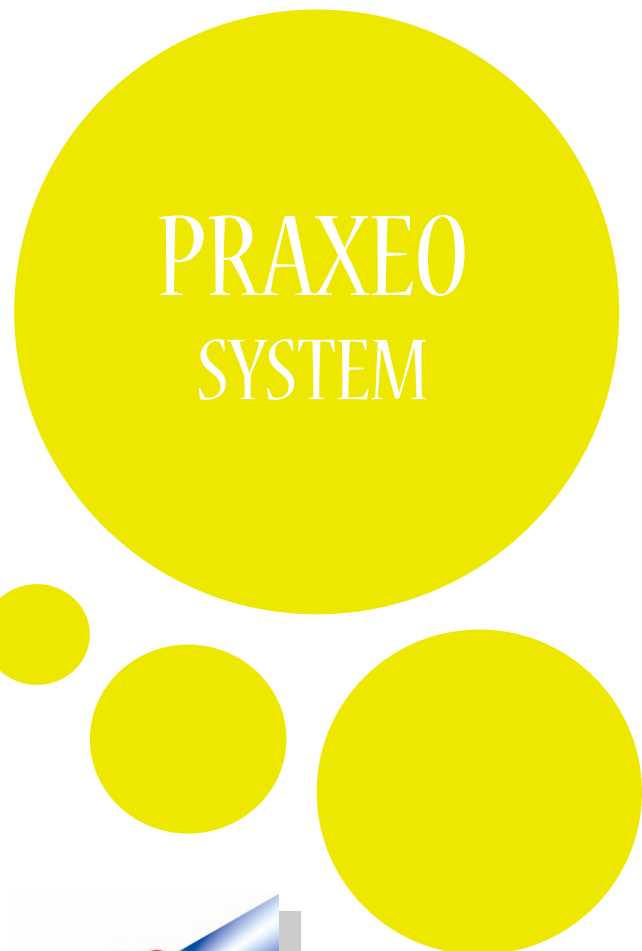

The Praxeo system is without doubt the most reliable and secure site management tool in the industry, revolutionising the way SKG operates.

The flexible power of the Praxeo system allows SKG to tailor the software for different clients from various industries. Put simply, the Praxeo system simplifies processes, compliance, reporting and site management, allowing SKG to focus more on the job at hand.

Praxeo is not just a system — it's the solution.
