## FREE

### PRINT MANAGEMENT SOFTWARE

(FIRST 50 CALLERS ONLY!)

- Immediate savings of costs & time
- Increased productivity
- Automated and proactive system
- Peace of mind

## Click File, Select Print and **SAVE!**

First and foremost, SKG's print management software has provided **immediate savings** to our current clients of up to 40% of printing costs.

The **saving of time** is of equal importance. SKG's print management software has reduced time spent by office administration, IT and accounting departments in dealing with unpleasant and disruptive printing issues. The software ensures the efficient operation of day to day printing by remotely managing all printing matters.

SKG's print management software helps you manage one of the last remaining uncontrolled processes in your business; one of the last remaining ways for you to **cut your operating expenses significantly**.

So what are you waiting for? Call us now to find out more...

All SKG clients who have chosen Print Manager Platinum (powered by Printfleet) for their print management software have reported an average increase of 36% in revenue and 11% reduction in core costs of operations since their program launch. Chances are, your competitors are planning or have already launched their print management program - what are you doing to stay ahead of your competition?

Print Manager Platinum is a complete remote monitoring system, designed to capture, store and analyse critical printing data from the location of your device. Print Manager Platinum has worked with clients to develop an advanced print management system that meets the specific needs of businesses in the imaging industry.

### Automate meter collection

Export meters automatically into one of several popular backend billing systems - Digital Gateway's e-automate, OMD Vision, La Crosse Nextgen, and Evatic - or download meters in .csv format to customise for import into virtually any system.

### Develop proactive supplies and service programs

Status alerts, maintenance scheduling and scheduled reports keep you informed of when devices require supplies or service. Increase device uptime, reduce inventory and improve your first call success rate.

### Track your success at each account

Mark devices as managed or unmanaged. Know exactly how many pages you are managing versus your competitors and track the increase of managed pages over time.

### Create reports for internal and external use

Create professional, customised and bundled reports. Reports can be set to be automatically e-mailed to a recipient on a pre-determined basis or can be downloaded in .pdf format with a custom branded cover from the web interface.
